Digital Accessibility Accelerator Program

FOUNDATIONS in DIGITAL ACCESSIBILITY

16-HOUR PROGRAM

Accessibility Foundations: Building Inclusive Digital Solutions

This 16-hour hands-on training program empowers cross-functional teams to understand and address digital accessibility barriers. Participants will explore the diverse needs of people with disabilities - including physical, cognitive, sensory, and neurological conditions - and learn how they interact with digital content. Through eight interactive modules, teams will gain practical skills in accessible design, development, and testing, while building the confidence to address accessibility challenges, and create user-friendly websites that meet the needs of all users.

DID YOU KNOW?

27-28%
The percentage of Canadians and Americans who identify as having at least one disability that impacts their daily lives!

96%
The percentage of website homepages that don't meet bare minimum guidelines for web accessibility!

JOIN OUR PROGRAM!

Get started on your digital journey by mastering techniques to build online experiences that won't leave anyone behind. Start building inclusively today!

$799 USD/seat

FOUNDATIONS in

DIGITAL ACCESSIBILITY

This program equips cross-functional teams with the knowledge and practical skills needed to address accessibility barriers. From understanding disabilities to mastering tools and techniques for accessible design, development, and testing, this course will empower your team to build inclusive, user-friendly websites that leave no one behind.

PROPOSED AGENDA

SESSION 01

Understanding Digital Accessibility

1. Fundamentals of accessibility
2. Exploring accessibility barriers
3. Principles and guidelines
4. Runing accessibility evaluations

SESSION 02

Keyboard Accessibility

1. Intro to keyboard accessibility
2. Keyboard operability challenges
3. Crafting keyboard experiences
4. Practical keyboard improvements

SESSION 03

Testing with Automated Tools

1. Intro to automated testing tools
2. Running automated testing
3. Integrating automated tools
4. Insights to real-world scenarios

SESSION 04

Colours & Visual Considerations

1. Contrast, legibility, and use of colour
2. Leveraging contrast checking tools
3. Techniques for visual accessibility
4. Visual barriers in real-world projects

SESSION 05

Screen Reader Accessibility

1. Introduction to screen readers
2. Navigating with screen readers
3. Screen readers workflows
4. Screen reader testing techniques

SESSION 06

Accessibility of Images and Graphics

1. Intro to accessible visual content
2. Best practices for effective alt text
3. Techniques for image accessibility
4. Accessibility testing for images

SESSION 07

Code and Semantic Considerations

1. Value of semantic HTML code
2. Accessible coding best practices
3. Optimizing semantic structures
4. Accessibility testing for HTML

SESSION 08

Accessibility of Forms and Tables

1. Intro to accessible forms and tables
2. Impact of accessibility barriers
3. Best practices for forms and tables
4. Testing for forms and tables
